

Excellent Traffic Tolerance

Very Low Water Needs

Excellent Heat Tolerance

Very High Drought Tolerance

## KIKUYU

### Pennisetum Clandestinum

Kikuyu is a medium to coarse textured, light green warm season grass which spreads by vigorous rhizomes and stolons. Very high drought tolerance.

#### LAWN FEATURES

|                       |  |
|-----------------------|--|
| New Lawn Coverage     | 33m <sup>2</sup> (15g/m <sup>2</sup> )         |
| Interseeding Coverage | 50m <sup>2</sup> (10g/m <sup>2</sup> )         |
| Weeks to Germination  | 1 to 2 weeks, with soil temperature above 25°C |
| Sowing Season         | Summer   |
| Colour                | Medium to Dark Green                           |
| Growth                | Fast   |
| Leaf Texture          | Coarse   |
| Spreading Activity    | Rhizomes and Stolons                           |
| Maintenance           | Moderate                                       |
| Fertilising Needs     | Low  |
| Shade Tolerance       | Low  |
| Winter Dormancy       | Yes - Below 4°C                                |
| Recovery Capacity     | Excellent                                      |
| Traffic Tolerance     | Excellent                                      |
| Heat Tolerance        | Excellent                                      |
| Mowing Height         | From 1cm                                       |
| Mowing Frequency      | Moderate to High                               |
| Drought Tolerance     | Very High                                      |
| Salt Tolerance        | Moderate                                       |
| Irrigation Needs      | Very Low                                       |
